

Bhavani TR

GenAI Transformation Leader | Data & Cloud Platform Strategist

GenAI Transformation Leader with 20+ years of experience delivering AI, cloud, and data modernization solutions across Healthcare, Life Sciences, and Banking. Expertise in Generative AI, Agentic AI, RAG, AWS, Snowflake, and Data Engineering, with a proven track record of building scalable platforms and driving enterprise transformation.

WORK EXPERIENCE

Senior Architect – GenAI & Data Platform Architect

Virtusa | AstraZeneca | Healthcare Domain

2020 - 2026

GenAI Transformation

- Led strategic AI, cloud, and data transformation initiatives supporting enterprise-scale digital platforms within Life Sciences and R&D organizations.
- Defined AI and Data Platform roadmap aligned with enterprise technology strategy and business objectives.
- Led development of reusable GenAI platform capabilities including: Enterprise LLM Integration, RAG Frameworks, Knowledge Management Platforms, AI-powered Search Solutions, Intelligent Automation Services
- Designed scalable cloud-native architectures leveraging AWS, Snowflake, PostgreSQL, and Data Lake technologies.
- Established governance processes for AI adoption, model onboarding, platform security, and compliance.
- Collaborated with business stakeholders, architects, data scientists, and engineering teams to identify and prioritize GenAI opportunities.
- Delivered AI-driven automation solutions reducing manual effort and improving operational efficiency.
- Built enterprise reporting and analytics solutions using Power BI and cloud-native data services.
- Engaged in fine-tuning and evaluation of the automation framework for multiple projects parallelly. Over 5 Projects were started using my proposed solutions with 20% less cost
- Technologies: Snowflake | Python | LangGraph | RAG | PostgreSQL | Data Lake | Power BI | AI Automation | AWS | DBT

Data Engineering & AI Platform Lead

Fipsar | UnitedHealth Group | Healthcare Domain

2018 - 2020

R&D Digital Platform

- Led enterprise data platform modernization initiatives supporting healthcare analytics and digital transformation programs.
- Designed and developed scalable Python-based automation frameworks for API testing, data validation, and workflow orchestration.
- Built metadata-driven ETL pipelines for ingesting and processing structured and semi-structured healthcare data from multiple source systems.
- Contributed to enterprise-wide digital transformation programs focused on automation, operational efficiency, and cost optimization.
- Worked closely with Information Security and Compliance teams to ensure alignment with HIPAA, ISO 27001, and enterprise security standards.
- Participated in strategic planning, quarterly roadmap discussions, sprint planning, and technology modernization initiatives.
- Supported AI and advanced analytics readiness by establishing high-quality, governed datasets for future machine learning and GenAI use cases.
- Technologies: Python, ETL, Data Engineering, SQL, PostgreSQL, AWS S3, REST APIs, JSON, XML, Data Warehousing, Data Governance, Power BI, Agile, JIRA, Confluence

WORK EXPERIENCE

Senior Technical Manager – Banking Data & Digital Transformation

Bank of America | Standard Chartered | Citi Bank | HCL | JPMC | Hexaware

2007 - 2016

Digital Transformation

- Led end-to-end delivery of enterprise banking applications supporting Payments, Treasury, Trade Finance, Wealth Management, AML, and Core Banking operations.
- Designed and implemented large-scale data integration and reconciliation solutions processing millions of financial transactions across multiple regions.
- Developed and optimized complex SQL-based data processing frameworks for operational reporting, business intelligence, and regulatory compliance.
- Improved reconciliation matching rates from **20% to 80%** through data quality and automation improvements.
- Supported multi-region implementations spanning **APAC, EMEA, and North America**.
- Built and maintained ETL pipelines integrating data from multiple banking systems, payment gateways, and third-party platforms.
- Led implementation of transaction reconciliation platforms handling Nostro, Vostro, and Suspense Accounts across global banking operations.
- Designed secure integrations with SWIFT, NEFT, RTGS, and payment gateway platforms enabling real-time transaction processing.
- Established automated validation and reconciliation mechanisms improving operational efficiency and reducing manual effort.
- **Technologies** SQL, Oracle, Data Warehousing, ETL, Banking Platforms, TLM Reconciliation, SWIFT, NEFT, RTGS, Payment Gateways, Unix, Shell Scripting, Reporting, Business Intelligence, Data Governance, Agile Delivery

CAREER ACHIEVEMENTS

Delivered Multi-Million Dollar Enterprise Technology Initiatives

Achievements/Tasks

- **20+ years** of experience delivering enterprise-scale technology, data, and digital transformation programs across Healthcare, Life Sciences, and Banking domains.
- Successfully led and delivered **50+ enterprise projects** spanning Data Platforms, Cloud Migration, Automation, Analytics, and Digital Transformation initiatives.
- Managed cross-functional teams of **50+ engineers, analysts, architects, and delivery professionals** across India, Europe, and North America.
- Delivered **\$10M+ worth of transformation initiatives** across Healthcare, Life Sciences, and Banking sectors.
- Improved reconciliation accuracy from **20% to 80%** through data quality improvements, automation, and process optimization.
- Reduced complex data processing effort from **10 days to less than 2 hours** through reusable automation and data engineering frameworks.
- Managed project portfolios valued at **\$5M+** supporting global clients including AstraZeneca, UnitedHealth Group, Bank of America, Citi, and Standard Chartered Bank.
- Delivered cloud-native solutions leveraging AWS, Snowflake, Data Lakes, and modern data architectures to improve scalability and operational efficiency.
- Built AI-ready data foundations enabling Analytics, Machine Learning, and Generative AI adoption.
- Delivered solutions supporting **millions of transactions annually** across global banking, healthcare, and life sciences platforms.
